DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/15/04 has been entered.
2. This action is responsive to amendment filed 7/15/04.
3. According to the amendment, claims 1-57 are pending in the application.

Reasons for Allowance

4. Claims 1-57 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Claim 1 claims a method for terminating profile sweeps for multiple bodies in a computer implemented solid modeling system, comprising: generating a planar profile of curves; sweeping the profile along a specified path to generate a tool body; terminating the sweep profile, when the tool body interacts with blank bodies to predefined extent, using a graph-based method for multi-bodied sweep termination. The closest prior art Sowar (5,351,196) teaches generating of numerical control tool paths on solid models, Sowar's teaching refers to a single-blank body and uses a projected constraint profiles, but does not teach using a graph-based method for multi-bodied sweep termination. Ji

Art Unit: 2671

(ACM, 1997) teaches using graph-based approaches, but does not teach using a graph-based method for multi-bodied sweep termination. For these distinct features, claim 1 is allowed.

Claim 20 claims an apparatus for terminating profile sweeps for multiple bodies, comprising a computer and a solid modeling system, having logic for executing the steps same as the method steps of claim 1; therefore, claim 20 is allowed under the same reasons set forth in claim 1.

Claim 39 claims an article of manufacture embodying logic for terminating profile sweeps for multiple bodies in a computer-implemented solid modeling system, the logic comprising the steps same as the method steps of claim 1; therefore, claim 39 is allowed under the same reasons set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
